As property owners on Prairie View Dr, and in the flight path of Aurora Airport Traffic, we would like to be on record for the following concerns on the expansion:

1. Citizen participation and transparency has been non-forth coming prior to this meeting. We hear money is allocated for the runway expansion and the plan is ready to go without a full evaluation of the project and its affects to the area. Since this expansion will highly impact this area, a full disclosure and analysis needs to be completed.
2. Infrastructure is a huge constraint to this area and questions need to be answered on water requirements relative to where this volume will be coming from and how sewer and runoff will be handled. Who will be expected to fund these?
3. The impact on local transportation will lead to more I-5 congestion at the southbound auxiliary lanes from Wilsonville Rd. to Charbornneau & Hwy 551 (I-5 exit 283 to exit 282 A & B). The Accident frequency in this area is already above quidelines and without road changes, this will worsen.
4. The impact of additional and larger planes will need to be studied on property values. There are a number of jets flying over our house now on approach, larger ones will not be good,

We feel the grant application to FAA should be held until these major issues are addressed. The Airport Developers would like local citizen acceptance but not working with the community for an acceptable solution will not be in everyones best interest.

Regards,

Anthony & Diane Bella
