To Whom It May Concern,

We have lived in the Carbonneau Neighborhood for 2 years. This past summer we have heard an increase in Airplane traffic noise.

We are concerned that if the Aurora Airport is expanded, the increasing noise of airplane traffic will affect our home value.

Please consider variations in your expansion that will insure our Carbonneau community remains a quiet, strong, and viable place to live; which includes preserving our property values that will be diminished by any expansion increase in air traffic.

Sincerely,

Greg and Donna VanderZanden
